

IRRIGATION DESIGN and MANAGEMENT CLASS

Sierra College Class ID# 22060

Nov 14, 2009

What kind of irrigation system should I design for?? Flood, sprinkler, drip or maybe a combination of these? This class will cover advantages, disadvantages of the different irrigation systems. We will go through a sprinkler irrigation design, sizing pipelines, nozzles, pumps, and determining application rates based on your soil limitations and plant consumptive use needs. Also covered is where to place miscellaneous valves and how to install pipelines.

- ***Irrigation Water Management will be covered***
- ***How to determine when to irrigate and how much to apply will be covered***
- ***How to evaluate existing sprinkler and drip irrigation systems***

This will be a fun and informative day. Bring a lunch, a note pad and your irrigation questions

This is an all day class 9a-4p: \$78 tuition + \$10 for class materials – To register call 800-242-4004 x 7160
Class Location: Sierra College – Rocklin Campus (for more details please call Keith Crabtree at 530-635-1253)
